About Me

I am a Software Engineering student at AASTU (Addis Ababa Science and Technology University) with hands-on experience in application development, digital design, databases, and web technologies. I completed two internships at Florida Southeast University, starting from digital design and technology support to Power Apps application development. I am also experienced in troubleshooting, teamwork, project leadership, and technical presentations.

SKILLS

- **Programming**: C++
- **Application Development**: Power Apps, Dataverse
- **Databases**: SQL, SQLite
- **Web**: HTML, CSS
- **Design**: Photoshop, Illustrator, Canva
- **Tools**: Git/GitHub, WordPress, Jira

EDUCATION

BSc Software Engineering

Addis Ababa Science and Technology University (AASTU)
Expected 2029

Academic Average: 3.76/4.00

Presidential Award for Academic Performance

PROFESSIONAL EXPERIENCE

Jul 2026 – Aug 2026
Florida University Southeast

Power Apps & Application Development Intern

- Built an inventory management and reservation application using Power Apps and Dataverse.
- Developed an individual version selected to represent the interns' work and supported teammates by troubleshooting and explaining bugs in their applications.
- Facilitated a daily team meeting as Scrum Master, tracking progress and maintaining team alignment.
- Led the final application demonstration for managers and employees from multiple departments.

Jul 2025 – Sep 2025
Florida University Southeast

Digital Design & Technology Intern

- Designed social media content for Instagram, Facebook, and X using Canva.
- Created PowerPoint presentations based on team requirements and project themes.
- Worked with the EduCustomer team and independently translated requirements into completed deliverables.
- Received training in Power Apps, WordPress, Jira, Confluence, Canvas LMS, and Scrum.

SELECTED PROJECTS

C++ Inventory Management System

- Developed a console-based inventory system using C++ and SQLite, with SQL database operations and data export functionality.

Freelancing Platform — Hackathon Project

- Contributed JavaScript functionality to a front-end freelancing platform through independent research and implementation.
- Collaborated with the team to integrate the implemented functionality into the project.

LEADERSHIP & COMMUNITY

- **Class Representative — AASTU**
- **Amharic Language Volunteer Instructor — AASTU Language Club:** Taught Amharic to students from Somalia and South Sudan throughout the academic year.
- **Dance Instructor — AASTU Dance Club**
- **Project Team Leadership**
